**Part III DETAILED ACTION**

1. Claims 1-20 are pending.

**Restriction/Election**

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-3, drawn to a polypeptide, classified in class 530, subclass 350.

Group II. Claims 4-7, drawn to a method of screening with the polypeptide of claim 1, classified in class 435, subclass 29.

Group III. Claims 8-10, drawn to a peptide having residues 90-138 of SEQ ID NO. 2, classified in class 530, subclass 324.

Group IV. Claims 11-14, drawn to a method of screening with the peptide of claim 8, classified in class 435, subclass 29.

Group V. Claims 15-16, drawn to a peptide having residues 196-246 of SEQ ID NO. 2, classified in class 530, subclass 324.

Group VI. Claims 17-20, drawn to a method of screening with the peptide of claim 15, classified in class 435, subclass 29.

The inventions are distinct, each from the other because of the following reasons:

3. Groups are unique products. They differ with respect to their physicochemical properties and are therefore patentably distinct.

Groups are unique methods. They differ with respect to ingredients and method steps.

Groups I, III, V and II, IV and VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. 806.05(h)). In the present case, the products as claimed, the peptides or polypeptide can be used to make antibodies.

4. Because a search of these six distinct inventions would not be co-extensive with a search of the others, an examination and search of two or more inventions in a single application would constitute a serious undue burden on the examiner.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor or at least one claim remaining in the application. Any amendment of the inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (h).

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Nolan whose telephone number is (703) 305-1987. The examiner can normally be reached on Tuesday through Friday from 9:00 am to 5:30 pm.

9. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Christina Chan, can be reached at (703) 305-3973. The FAX number for our group, 1644, is (703) 305-7401. Any inquiry of a general nature relating to the status of this application or proceeding should be directed to the Group receptionist, whose telephone number is (703) 308-0196.
